SUMMARY

Network operations professional with 4+ years in IT, progressing from service desk to two years owning P1/P2 incidents in a 24/7 enterprise NOC across 50+ client environments. Works critical outages under SLA pressure from first alert through triage, mitigation, and deep root cause analysis, then documents findings so they don't recur. Brings a security lens to alert triage, firewall and VPN investigations, and access issues, backed by a B.S. in Cybersecurity and CySA+, PenTest+, and Security+.

PROFESSIONAL EXPERIENCE

Specialist, Incident ITS Network Operations — **May 2024 – Jun 2026**

Netrix Global (formerly part of Ricoh USA division) — Managed Service Provider — *Commack, NY*

- Owned P1/P2 incidents end to end across 50+ enterprise client accounts in a 24/7 NOC, correlating LogicMonitor alerts (SNMP, syslog, API polling) and driving ServiceNow incidents from triage through resolution within defined response windows to sustain 99.9% uptime SLAs.
- Performed deep root cause analysis on critical network outages across VPN tunnels, firewall rule sets (Cisco, Fortinet, Meraki), BGP/VLAN configurations, and WAN/LAN topology, using syslog and alert data to isolate faults; completed change management reviews before remediating.
- Cut incident response time by ~30% by retuning LogicMonitor alert thresholds and AI-assisted dashboards to reduce alert noise; wrote post-incident RCA reports and recovery runbooks that built the team knowledge base and supported disaster recovery response.

IT Support Analyst, Level II (Contract) — **Oct 2022 – Feb 2024**

ICCS & Co. LLC — Managed Service Provider — *New York, NY (Remote)*

- Triaged and investigated security threats and escalated incidents from executive and VIP clients through diagnosis and resolution, acting quickly to limit downtime and exposure while maintaining 95% client satisfaction.
- Built an extensive ConnectWise Manage knowledge base of network troubleshooting, incident resolution, and escalation procedures, cutting average ticket resolution time by 25% across a multi-tenant client portfolio.

Service Desk Analyst, Associate — **Apr 2021 – Jan 2022**

Allscripts — Managed Service Provider — *Melville, NY*

- Owned Tier-1 clinical IT issues from first call to resolution, achieving 70% first-call resolution (FCR) across Windows endpoint, hardware, and network incidents within SLA windows.
- Handled identity and access tasks for clinical staff, including Active Directory provisioning, MFA enrollment, and SSO troubleshooting, resolving authentication issues during onboarding and offboarding.

PROJECTS

Wazuh SIEM Home Lab — *in progress* — **2026**

- Running a Wazuh manager on VMware to collect telemetry from a victim VM; simulating attacks against it to build and tune detections mapped to MITRE ATT&CK.

EDUCATION

B.S., Cybersecurity and Information Assurance — Western Governors University — **2026**

CERTIFICATIONS

- **Security:** CompTIA PenTest+ (2026) · CompTIA CySA+ (2025) · CompTIA Security+ · ISC2 SSCP (2025)
- **Networking:** Cisco CCNA (2025) · CompTIA Network+
- **Additional:** CompTIA A+ · CompTIA Project+ · ITIL 4 Foundation · LPI Linux Essentials

TECHNICAL SKILLS

- **Incident Handling:** P1/P2 triage, escalation, root cause analysis, post-incident reporting, runbooks, change management; MITRE ATT&CK, NIST CSF
- **Security:** Splunk, SentinelOne (EDR), LimaCharlie, Tines (SOAR), Metasploit, Cisco Talos, VirusTotal, Wazuh
- **Networking:** TCP/IP, OSI model, routing & switching, BGP, OSPF, VLANs, STP, ACLs, VPN, DNS, DHCP, SNMP, segmentation; Cisco, Fortinet, Meraki, Ubiquiti
- **Network Tools:** Wireshark, tcpdump, Nmap, Advanced IP Scanner, Visual TraceRoute, Visio, draw.io
- **Monitoring & ITSM:** LogicMonitor, ServiceNow, ConnectWise, Kaseya
- **Systems & Cloud:** Windows 10/11, Linux, Active Directory, IAM (SSO/MFA), Microsoft 365, VMware, Hyper-V, AWS
- **Scripting & Automation:** Python, Bash, PowerShell, SQL, SPL (Splunk)
